ANNUAL ACADEMIC MEETING

DERMFEST 2009

SATURDAY 28 NOVEMBER

HILTON MALTA

Dear friends

It is a singular pleasure to invite you once again to the MADV annual scientific meeting. This year's main topic will be the interaction of the psyche and the skin, an important issue suggested at the opening of the 2008 DermFest by Dr Joe Cassar the Hon Parliamentary Secretary for Health during his speech at the Opening Ceremony.

On this occasion MADV welcomes eminent personalities from the fields of Psychiatry and Psychology who will team up with members of MADV to give an update on this up and coming topic that is receiving plenty of attention in international medical fora.

The other session will be devoted to *materia dermatologica* and updates on several topics of daily interest will be amply discussed. These will include skin cancer, wound healing, the skin in pregnancy, seborrhoeic dermatitis and rosacea, scalp and hair disorders, light sensitive rashes, and a 'What's new session'.

Your participation will be welcomed and should be useful in daily clinical practice. Once again the Hilton will welcome us for a repeat of the highly successful meetings held there previously and early registration is encouraged because of the high turn out expected.

**We look forward to welcoming you all
on Saturday 28th November.**

Joseph L. Pace MD FRCPEdin FRCPLond F.Coll. Phys(Phila) FAAD KM
President

SATURDAY 28 NOVEMBER

DERMFEST 2009
